Education

Stevens Institute of Technology

Hoboken, NJ

Master of Engineering in Engineering Management (GPA: 4.0)

September 2025 – May 2026

Bachelor of Engineering in Software Engineering, Highest Honors (GPA: 3.9)

September 2021 – May 2025

Experience

Intercontinental Exchange, NYSE

New York, NY

Analyst, Multimedia Engineering

March 2026 - Present

- Deployed and documented AV/IT infrastructure across multiple enterprise office locations, including Haivision encoder chassis, BrightSign digital signage players, Analog Way video systems, and Dante audio-over-IP networks supporting NYSE trading floor and corporate communications workflows
- Maintained structured Confluence documentation for enterprise multimedia systems, developing wiki templates and labeling methodologies to improve knowledge management across the team
- Traced and documented end-to-end AV signal chains across trading floor and corporate environments, including video wall infrastructure, encoder-to-display distribution, and audio/video routing across multi-room and multi-site deployments

Analyst, End User Computing

July 2025 - March 2026

- Provided on-site technical support for Windows and macOS endpoints across NYC offices, managing device imaging, deployment, and inventory in compliance with enterprise security standards
- Diagnosed and resolved complex endpoint and application issues through root-cause analysis, administering platforms including Active Directory, Microsoft Intune, Jamf, Altiris, ServiceNow, and Microsoft 365
- Supported conference room AV technology and core networking needs, collaborating with cross-functional teams and contributing to documentation of repeatable support processes

Wakefern Food Corp.

Edison, NJ

Merchandise and Finance Intern

June 2025 - July 2025

- Developed and maintained COBOL programs on enterprise mainframe systems to process operational data and support real-world business workflows
- Built foundational experience with SAP BTP and Business Application Studio by completing SAP Learning Hub coursework and working with secure FTP-based data transfers
- Created internal process documentation and participated in professional development workshops focused on technical growth, resume building, and networking

Projects

Hoboken Hunters Rent Calculator (Fall 2024 - Spring 2025): Developed a web-based application in partnership with the City of Hoboken to help residents instantly calculate legally permitted rent increases under local rent control laws. Built and deployed using Railway with a PostgreSQL backend, the tool collects lease details, dynamically applies CPI data, and outputs accurate rent increase calculations across devices.

Skills and Technologies

Languages: Python, SQL, JavaScript, HTML, CSS, C++, Java, PowerShell

AV & Media Systems: Haivision, BrightSign, Analog Way, Dante/DDM, Q-SYS, Lutron, LG webOS, AppSpace, Crestron, Novastar

Networking & Infrastructure: Juniper EX, VLAN Administration, SRT/UDP Multicast, TCP/IP, Active Directory

Tools & Platforms: Confluence, ServiceNow, Jamf, Microsoft Intune, React, Node.js, GitHub, Git, CI/CD, Agile Development, Prompt Engineering, MS Office, LaTeX

Leadership & Community

Vice President of Ritual and Traditions of Alpha Sigma Phi (Alpha Tau): Coordinated fraternity rituals, led values-based education, and organized fundraising initiatives that contributed to over \$12,000 donated.
